Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. appeared first on Ndromady. In the aftermath of the Easter Sunday bombings in Sri Lanka, the Government of India has said that the country's Tamil community will be "taken to the camps" if it retaliates against the Islamic State. (India Today) According to The Hindu, The Ministry of Home Affairs (MHA) and the department of external affairs (MEA) have come out with a tough statement that if Indian Tamils retaliate, they will be put in internment camps. Deputy National Security Advisor Ajit Doval warned the Tamil community on the 22nd of April "If we push, you will get to the camps". To which Mayu Swaminathan, spokesperson from MEA, added, "If anyone tries to take the law into his/her hands, he/she will be taken to the camps." That was the first time the Government of India had publicly referenced the internment camps that a hundred or so Tamils have been held in since 1984. No decision has yet been made to implement the internment camps, the Government has simply threatened to go ahead. MEA is preparing a list of 1,500 suspected terrorists in the country and is seeking proposals to detain them at undisclosed places. No timescale has been given for the closing of the camps, but Prime Minister Narendra Modi, again, warned of persecution if anyone takes the law into their hands. "Those who make an attempt at such irresponsible actions or support them in any manner, will be arrested and severely punished under the law," he warned. "No excuse will be accepted. No sympathy will be shown." When asked what the Government's next step will be if the Tamil community take up arms, Modi added, "If an act of terrorism is committed, even then, no one will be spared under the law." Thus, the Government of India has threatened to imprison and persecute the Tamil community and there is no independent legal recourse to act in retaliation.

This invention relates generally to a manipulator, and more particularly to a manipulator which is adapted to position a proximal end of a body part to be treated, while viewing the same in predetermined gaze directions. In dental and surgical treatments, treatment is performed in such a way that the doctor observes various images of objects which include a patient's teeth on an X-ray film or an intraoral image which is recorded on a video tape and a video picture monitor. In such cases, if a treatment item, which is positioned on a patient's mouth, is not precisely aligned with the part where the images of the teeth are to be viewed, the correctness of the treatment cannot be obtained. Accordingly, a movable jig is used for setting the treatment item in the treatment position.
