An ancient and powerful dragon magician has reincarnated. The old dragon magician was an ancient and powerful wizard who was busy resurrecting himself as a dragon magician and exterminating the world's dragons. Therefore, he is the Dragon King. Recruited by the Emperor, the newly reincarnated dragon magician defeated the Dragon King and adopted his name, "Crescent Moon Dragon." But if he fails to complete the Dragon King's plan, he will be punished. \*\*\*ALSO available in the game's main menu as a graphical costume\*\*\*

Development Summary: All Effects All SFX are complete and well-composed, as was mentioned above. Music I also hope to release the original music in the future, which has a charming and magical feel. (Note: Square Enix, the company that develops and publishes RPG Maker, will cover any cost to reproduce the music.)

“Earth's Last Remnant is an interesting indie RPG that puts exploration and tactical combat in the middle of one of the most enjoyable action RPGs of the past few years.” 8/10 – Metro Gamer

“The character creation is creative and I like that they didn't try to match the default classes, which is useful for altering them to your liking. There's also a ton of customization which helps to make this class more unique than many of the other elements. It's a fun break from the norm.” 8/10 – Rock, Paper, Shotgun

“Alongside the synth-pop soundtrack, the game's wide

variety of game mechanics makes it feel more like the Dark Souls series than any other indie RPG.” 8/10 – Pocket Gamer “The evolving combat is a good balancing act. The winning formula: Make it difficult and teach your player to use the tools at their disposal.” 9/10 – Game Informer Company Newsletter
